

TEMITAYO KEHINDE

Frontend Engineer

 kehindetemitayo.b@gmail.com  linkedin.com/in/temitayo-kehinde  github.com/benkennyt  kehindetemitayo.vercel.app

Professional Summary

Frontend Engineer with 3 years of experience building scalable web applications across eCommerce, healthcare, and fintech domains. Proven track record of improving application performance by up to 35% and leading full-stack development projects. Expertise in React.js, Next.js, and TypeScript with strong collaboration skills in cross-functional teams.

Experience

The Alternative Bank

May 2025 – Present

Software Developer – React

- Develop and maintain scalable user interfaces for financial products using React.js and modern frontend tools
- Collaborate with designers and backend engineers to deliver accessible, high-performance web experiences
- Integrate frontend applications with RESTful APIs and optimize performance across multiple devices and browsers
- Implement clean, tested, and version-controlled code following industry best practices within cross-functional teams

ClearerPay

October 2024 – May 2025

Lead Frontend Developer (Contract)

- Led complete frontend development of a multi-currency financial platform, delivering wallet creation, currency swaps, and money transfer features using Next.js and TypeScript
- Architected and refactored legacy codebase, improving performance by 40% and reducing development time by 25%
- Built and deployed responsive UI components powering rapid early traction with growing daily active users and 99.9% uptime
- Implemented secure API integrations and robust state management to ensure safe and reliable financial transactions
- Delivered project independently while collaborating with product team, demonstrating leadership and full ownership

ByteDigital Technologies

July 2024 – May 2025

Frontend Web Developer

- Developed customer-facing and admin interfaces for a telehealth platform
- Built real-time appointment scheduling system and secure authentication flows for patients and healthcare providers
- Optimized UI/UX components resulting in 20% increase in user engagement and 15% reduction in support tickets
- Collaborated with 3-person frontend team to deliver features ahead of sprint deadlines consistently

Teravena

September 2022 – October 2024

Frontend Developer (Intern → Junior Developer)

- Developed and maintained responsive web applications for eCommerce and HR platforms using React.js
- Conducted code reviews and implemented performance optimizations, reducing page load times by 35%
- Built user authentication and real-time tracking features for inventory management system
- Enhanced eCommerce store features contributing to improved user shopping experience and conversion rates
- Contributed to HR platform development, focusing on performance tracking and employee self-service modules

Key Projects

ClearerPay Platform | Next.js, TypeScript, Redux

- Solo-developed complete frontend for multi-currency financial platform with wallet management and international transfers
- Integrated local payment APIs supporting 5+ currencies with real-time exchange rates
- Implemented responsive design system serving users across web and mobile platforms
- Built comprehensive admin dashboard for transaction monitoring and user management

HealthChecker Platform | React, TypeScript, Redux

- Developed patient and provider interfaces supporting online consultations, appointment scheduling, and test kit ordering
- Implemented real-time chat and video integration for seamless doctor-patient communication
- Built secure authentication system with role-based access for patients, doctors, and administrators
- Optimized application performance ensuring consistent load times across all devices

Technical Skills

Programming Languages: JavaScript, TypeScript, HTML5, CSS3, Python

Frontend Technologies: React.js, Next.js, Redux, MobX, jQuery, Bootstrap, Tailwind CSS

Backend & APIs: Node.js, Express.js, RESTful APIs, MongoDB

Testing & Quality: Jest, React Testing Library, Cypress, ESLint, Prettier

Tools & Platforms: Git, GitHub, Netlify, Vercel, Firebase, Figma, Postman, Docker
