EXPERIENCE

Frontend Developer (Intern → Junior Developer)
Teravena | September 2022 – October 2024

- Developed and maintained responsive web applications.
- Conducted code reviews and optimized performance for better efficiency.
- Worked on a React-based eCommerce store, focusing on the product catalog and shopping cart.
- Contributed to an HR platform, emphasizing performance tracking and self-service modules.
- Assisted in building an inventory app, implementing user authentication and real-time tracking features.

Frontend Web Developer
ByteDigital Technologies | July 2024 – Present

- Primarily worked on a health app, assisting in developing both the customer-facing and admin-side interfaces.
- Collaborated with other frontend developers to build and refine features.
- Focused on optimizing UI/UX for seamless user interactions.
- Ensured code maintainability and performance improvements across the application.

Frontend Web Developer
ClearerPay | November 2024 – Present

- Leading the frontend development of a fintech application as part of a startup team.
- Developing high-performance, user-friendly interfaces tailored to financial services.

SELECTED PROJECTS

HealthChecker *(ByteDigital Technologies)*

- Developed the customer and admin interfaces for a telehealth platform using React, TypeScript, and Redux.
- Enabled online doctor consultations, home visit scheduling, and test kit ordering.
- Implemented real-time appointment management and secure authentication for users and doctors.
- Optimized UI for a seamless user experience across devices.

ClearerPay *(ClearerPay)*

- Contributing to the frontend development of a multi-currency financial platform.
- Built features for creating wallets, sending/receiving money, and currency swapping.
- Collaborating with backend developers to integrate secure payment APIs.
- Ensuring a smooth, intuitive user interface for financial transactions.
